What is a Clinical Outreach Librarian Service?

If you invite us to join your:
- Clinical or corporate teams
- Grand or Ward rounds
- Meetings

We can respond to questions that arise in your workplace by:
- Carrying out literature searches of the available evidence
- Providing help and advice using information retrieval and critical appraisal skills

We provide you with:
- Most relevant search results presented in an evidence-based hierarchy
- Abstracts of relevant articles
- Links to full text where appropriate
- Details of search strategies used and resources searched

We support:
Anyone who needs to find evidence to support their work

Current Awareness
We provide customised monthly bulletins which will help you to stay up-to-date throughout your career, enabling you to do your job effectively and efficiently.

Information skills Training
We will show you how to make best use of your time when you are looking for evidence-based resources.

Journal Club Support
We can provide you with advice on copyright issues, journal articles acquisition and signposting to critical appraisal resources.

We also offer

Clinical staff
- Save you time
- Provides quality-assured information at the point of need
- Help you make decisions based on the current best evidence

Patients
- Receiving the right treatment and support, in the right place, at the right time
- Individualised care on the basis of the best evidence available

Buckinghamshire Healthcare NHS Trust
- Contributes to service improvements, quality and productivity targets
- Promoting evidence-based practice, to ensure clinical and corporate decisions are supported by research
- Supports provision of the best clinical care

“Support your learning and information needs in your workplace”
