AUGUST 2019 Vol.28(8)

ORIGINAL RESEARCH
- Nurse staffing, nursing assistants and hospital mortality: retrospective longitudinal cohort study
- A qualitative positive deviance study to explore exceptionally safe care on medical wards for older people
- Characterising ICU–ward handoffs at three academic medical centres: process and perceptions
- Use of a maternal newborn audit and feedback system in Ontario: a collective case study
- Development and performance evaluation of the Medicines Optimisation Assessment Tool (MOAT): a prognostic model to target hospital pharmacists’ input to prevent medication-related problems
- Can patients contribute to safer care in meetings with healthcare professionals? A cross-sectional survey of patient perceptions and beliefs

VIEWPOINT
- Safety-I, Safety-II and burnout: how complexity science can help clinician wellness

SYSTEMATIC REVIEW
- Observer-based tools for non-technical skills assessment in simulated and real clinical environments in healthcare: a systematic review

LATEST CONTENT – August 2019

EDUCATION IMPROVEMENT REPORT
- Closing the gap: a transatlantic collaboration to foster quality improvement training in graduate entry medical students using applications of QI methodologies to medical education

NARRATIVE REVIEWS
- Review of alternatives to root cause analysis: developing a robust system for incident report analysis

ORIGINAL RESEARCH
- Quality of care during childbirth at public health facilities in Bangladesh: a cross-sectional study using WHO/UNICEF ‘Every Mother Every Newborn (EMEN)’ standards
- Exploring stakeholder perceptions around implementation of the Operating Room Black Box for patient safety research: a qualitative study using the theoretical domains framework

QUALITY IMPROVEMENT REPORT
- Improving medication optimisation in left ventricular systolic dysfunction after acute myocardial infarction
- Improving adherence to lung cancer guidelines: a quality improvement project that uses chart review, audit and feedback approach
- Quantitative stress-redistribution sequential imaging optimises MPI with the lowest dose of radiation per patient
- Improving the quality of insulin prescribing for people with diabetes being discharged from hospital
- Improving physical healthcare provided to psychiatric inpatients at an acute mental health trust
- Reducing pressure ulcers across multiple care settings using a collaborative approach
- Improving bone mineral density screening in patients with inflammatory bowel disease: a quality improvement report
- Evidence-based practice ‘on-the-go’: using ViaTherapy as a tool to enhance clinical decision making in upper limb rehabilitation after stroke, a quality improvement initiative
- Improving critical incident reporting in primary care through education and involvement
- Medic One Pediatric (MOPed) cards: standardising paramedic paediatric resuscitation
- Feasibility and performance of a patient-oriented discharge instruction tool for heart failure
- ‘Start smart’: using front-line ownership to improve the quality of empiric antibiotic prescribing in a paediatric hospital
- Improving intravenous fluid prescribing in the Eastern Cape in South Africa
- ENT Quality Improvement Program as a tool to improve the collection of morbidity and mortality data: a multisite audit carried out over 6 months
- Quality improvement project aimed at integrating an adapted mindfulness-based stress reduction programme into a paediatric psychology service
- Impact of a nurse engagement intervention on pain, agitation and delirium assessment in a community intensive care unit
- Stratification of inflammatory bowel disease outpatients by disease activity and risk of complications to guide out-of-hospital monitoring: a patient-centred quality improvement project
- Implementation and spread of a simple and effective way to improve the accuracy of medicines reconciliation on discharge: a hospital-based quality improvement project and success story

SHORT REPORT
- Well-prepared outpatient visits satisfy patient and physician
- Testing a proactive approach to frailty identification: the electronic frailty index
- Associations between patient experiences and clinical outcomes: a cross-sectional data linkage study of the Australian private healthcare sector
- Implementation of a standardised sign-up process to increase MyChart enrolment among HIV-positive patients
- Diagnosis of cardiac allograft vasculopathy in heart transplant patients using a pixelated stress perfusion
Occasionally, we'll highlight articles reporting QI studies, methods and audit to drive quality improvement. These articles, most with one or more authors affiliated to a UK/NHS organisation, have been published recently in journals which are not featured regularly in this bulletin. Please contact the Library for help with accessing the full-text of the articles or to request a literature search in your specialism.

**From ‘Q’ (The Health Foundation & NHS Improvement)**

**Side by Side – improving in partnership with patients and communities**
Blog post by Sarah Williams [Solent NHS Trust] | 27 Aug 2019  

Use of Q Exchange funding to “co-design a training module to support patients, families and communities get involved in QI, and work with our teams on projects”.

**Spotlight on SQUIRE (Standards for Quality Improvement Reporting Excellence)**

In issue number 5, October 2018 we highlighted the SQUIRE reporting guidelines and support for authors in the use of the guidelines. ¹ One recently published article² used the SQUIRE guidelines to report a QI project which utilised plan-do-study-act cycles with the aim of decreasing the primary caesarean birth rate.
